

Europe's Dark Cloud Report in Poland (July 2016)

The launch of Europe's Dark Cloud in Poland had a huge impact on national media. Apart from HEAL and WWF Poland, the Polish Green Network supported the media activities around the report. The coverage included main online news portals, radio stations interviews and written press in one of the biggest Polish daily (Gazeta Wyborcza). It was widely commented on social media channels, both by supporters and opponents of the pro-coal governmental policy.

As a follow up of the report launch, HEAL in Poland together with WWF and the Polish Green Network are in the process of sending a letter to the ministries of health, environment and energy, which will bring up the most important issues from the report and call on the government to speed up the process of phasing out fossil fuels for better environment and public health of citizens in Poland.
