

Health & Environment Alliance (HEAL)

Call for Interest:

Consultant on Health and Transport, Poland

HEAL is looking for an enthusiastic and outgoing professional, working with a team in Poland, and in close collaboration with the HEAL Brussels Secretariat.

HEAL is a leading European not-for-profit organisation addressing how the environment affects health in the European Union and beyond. Our alliance brings together over 90 member organisations, representing health professionals, not-for-profit health insurers, doctors, nurses, cancer and asthma groups, citizens, women's groups, youth groups, environmental NGOs, scientists and public health institutes. Members include international and Europe-wide organisations, as well as national and local groups (website: www.env-health.org). We have been active in Poland since 2013.

HEAL currently carries out educational and advocacy work to raise awareness of the health impacts of air pollution and climate change in Poland, and health interventions, building on the increased interest of the health and medical sector to be active on these issues.

This year, HEAL will be highlighting the contribution of the transport sector to air pollution and climate change, and develop a narrative on healthy mobility for Poland, especially at city level. These activities are part of HEAL's ongoing Europe-wide efforts on clean air and healthy cities.

Interested applicants should fulfil the following criteria:

- University degree in public health, social science, environment or communications
- Minimum two years of professional experience in working for an NGO, and experience in project coordination;
- Native level Polish, good written and spoken English.

Only candidates that work exclusively within the non-profit sector will be considered to avoid potential conflict of interests with clients representing commercial interests.

We're looking for someone with:

- Good communication, writing and presentation skills;
- Knowledge of environment and health problems in Poland, preferably in the field of air quality, or transport
- Ability to manage various activities and deadlines
- Ability to quickly synthesize studies and information for various stakeholders in Poland and beyond
- Good interpersonal skills, self-starter, flexibility and reliability

The contract will be awarded for work carried out between May 2021 and March 2022, for 18 days a month. The consultant should be based in Poland (ideally Warsaw or Lodz).

To apply, please send a motivation letter and CV, preferably in English, with the subject heading "Application Consultant Health and Transport" to Weronika Michalak, email: weronika@env-health.org. The motivation letter should detail why you are interested in the call, why you want to work for a public interest environmental health organisation and how your skills and experience are relevant to the job.

Deadline for expression of interest: 23 April 2021

Those applicants whose tenders are shortlisted will be contacted. We may in the meantime contact you for further information. Submitted documents will not be returned. Bidders may ask for feedback.

For any questions please contact Weronika Michalak, +48 782 466 881
