

# How can the CLP Regulation help identify harmful endocrine disrupting chemicals (EDCs)?

## Checklist for EDC identification

- Address EDCs for health and the environment
- Consider all available evidence, including independent scientific literature
- Leave room for case by case expert judgement
- Include pictograms for workers and public information

### The substance meets 3 criteria:

- ❖ Shows adverse effect in intact organism or progeny
- ❖ Shows endocrine activity
- ❖ There is a biologically plausible link between the endocrine activity and the adverse effect
