EU’s Clean Air for Health Transition 2021-2030

HEAL’s demands for clean air for health, for everyone

1. Increase the level of ambition
   - Fully align the EU’s air quality standards with WHO recommendations and the latest science, by 2030.
   - Set legally binding limit values, to address health inequalities.

2. Protect vulnerable groups to protect everyone
   - Include WHO’s comprehensive definition of vulnerable and susceptible groups.
   - Strengthen requirements for accessible, transparent public information on air quality.
   - Close the risk of compliance delays and exemptions.

3. Ensure the most health-protective enabling framework
   - Support an independent review of the evidence regularly carried out by WHO, at the core of the review mechanism.
   - Increase the density and representativity of monitoring stations.
