

AN EU-WIDE PFAS RESTRICTION THAT PROTECTS HEALTH

STRENGTHS OF THE PROPOSAL

Covers over 10,000 substances, including fluoropolymers, to prevent regrettable substitution.

Persistence as a key justification for the restriction.

Burden of proof on industries to obtain derogations for continued use of PFAS.

DEMANDS FOR IMPROVEMENTS

SET TIME LIMITS:

Time limits imposed for exceptions will ensure a swift transition away from PFAS.

1

LIMIT DIRECT HUMAN EXPOSURE:

Exemptions should not be granted for uses where humans are directly exposed, like food packaging or water pipes.

3

EXPAND SCOPE:

PFAS pesticides and biocides must be included in restriction scope.

2

STANDARDISE REPORTING:

Consistency in reporting industry derogations to reduce risk from PFAS.
